Loading method, equipment and responsible party

Unloading method, equipment and responsible party

How will the container be protected during loading and unloading?

Previous carrier approval or specific acceptance conditions (if known)

Questions or information still to be confirmed – for any shipment

A suitable carrier starts with your enquiry

Sea Logic has contracts with various carriers that explicitly accept loose scrap. Send your enquiry brief and one of our team members can help you book with a suitable carrier.

Confirm required carrier acceptance before booking and packing. Tell Sea Logic if the material, packing, container or loading proposal changes.
